

NOT ALL HAIR EXTENSION BRANDS ARE CREATED EQUAL

DISCOVER THE BEAUVOIR DIFFERENCE

EXCEPTIONAL HAIR QUALITY, PURE PIGMENTS, 40% DOUBLE-DRAWN, NO SILICONES

Beauvoir Stylist

THE BEAUVOIR DIFFERENCE

1. NATURALLY SOURCED. NEVER OVER-PROCESSED.

Our blonde shades are sourced from naturally blonde regions of Northern Europe and are never created by aggressively lightening dark hair.

Our dark shades are sourced from premium donors throughout Asia and India, ensuring exceptional strength, integrity, and consistency.

2. PURE PIGMENTS. NO TEXTILE DYES.

Many extension brands rely on textile dyes designed for fabrics and other non-hair applications. Beauvoir uses only professional-grade pigments similar to those found in salon color, allowing for beautiful, predictable results and greater compatibility with professional chemical services.

3. NO SILICONE. NO SHORTCUTS.

Some manufacturers use silicone coatings to temporarily mask hair quality and artificially increase gram weight.

At Beauvoir, we let the quality of our hair speak for itself. Our hair is prepared with professional shampoo and conditioner before packaging—nothing more.

4. DESIGNED FOR DENSITY FROM ROOT TO ENDS.

Every Beauvoir extension is crafted with approximately 40% double-drawn hair and contains no strands shorter than 10 inches.

The result is exceptional fullness, balanced volume, and beautiful density from root to ends—without the thin, wispy appearance common in many extension brands.

QUALITY WITHOUT COMPROMISE.

Superior Sourcing. Transparent Manufacturing, Exceptional Performance
