Client Extension Care Guide

Extension Care Instructions

- **Night Care:** Use a silk pillowcase and wear a scrunchie or bonnet to protect your extensions.
- **Moisturizing:** Apply a lightweight oil to keep hair smooth and nourished.
- **Brushing:** Use a brush designed for extensions to gently detangle your hair.
- **Avoid Exposure:** Steer clear of sunscreen and chlorine, as they can damage extensions.
- **Recommended Products:** Always use salon-recommended products to maintain extension quality.
- **Washing:** Limit washing to 1-2 times per week to prolong the life of your extensions.
- **Drying:** Always blow-dry your hair when wet; air drying is not recommended.
- **Masks:** Avoid moisture-rich masks, even if labeled as "extension safe," as they can loosen bonds.

Specific Weft Care

- **Genius Weft:** Avoid using hot tools near the top of the weft to prevent damage.
- **Machine Weft:** Shedding is normal up to 4 weeks after installation.
