High power and high temperature

- The mainstream markets prefer tools with higher wattage, which they believe are capable of delivering faster drying times and increased heat, making them suitable for thicker hair or quick styling needs.
- UniQ is with the highest power among Dyson and Shark, it can reach 1500W under 240V.
- High power plus the high-temperature will deliver a faster and long - lasting styling

Review over Shark's styling time and result

 Amazon Customer

★☆☆☆☆ **Not worth \$300**

Reviewed in the United States on January 4, 2024

I've never been so excited for a package to come, until I used it. I really wanted to LOVE the shark, but unfortunately I literally don't have one good positive about it. It leaves crimps in my hair, my curls fall out within 5-10 minutes and my hair usually holds curls SO WELL! My curls with my curling iron could last me about a week, but the shark curls don't even stay in past 30 mins. And I know "try mousse" "try heat protectant" "try cold shot for 20 secs" well I did! I've tried multiple different things and ways to curl but just nothing works. Not to mention how HOT the blowing air gets on my scalp! I can't even go how high i normally go with my curling iron because I feel like i'll actually get real burns on my head from the hot air. And also the blow dryer took like 20 mins to dry my hair when my other blow dryer takes 5 mins. There are just a lot of cons for me personally and my \$30 curling iron and \$25 blow dryer and even my \$30 blowout brush puts the shark to shame! I really really really wanted the shark to be as magical as it seems, but for me personally, it is the biggest waste of \$300.

Slim & Lightweight

- For multi-stylers, end users tend to use it for a longer time, and user experience will be affected if the tool is too heavy or too bulk to hold
- UniQ is the lightest among the 3 models and can be used for a long time without feeling the burden of the tool.
- UniQ has the slimmest handle with a round design, it offers a firm and comfortable hand grip and can be easily turned around during styling, more friendly to ladies with small hands

Noise Level

- People will use the multi-styler for more than 30 minutes to get the desired style, more often than not, they will hold the tool close to their ears for a very long time.
- If the tool is too loud during the styling process, it affects user experience; In the long term, a high noise level is a health risk.
- UniQ has the best noise performance, it doesn't create annoying and loud sounds.

Typical bad review over Shark's noise level

★☆☆☆☆ **Not worth it!**

Reviewed in the United States on January 2, 2024

I was so excited to get this - a hairdryer and curler all in one! But I really don't think that it's worth the hype. The first time I used it, I could not get a curl to stay. I watched a ton of videos because I figured I was doing it wrong. I tried it again the next day following all of the tips - small piece, 10 seconds, cool shot, turn off. There's maybe one curl on my head that stayed. The others either never curled, or fell immediately. I can't compare to the Dyson because I've never tried it, but I don't think this thing is worth \$300. It was also SO loud and didn't come with any kind of bag or carrying case for all of the parts. I will definitely be returning this today.

REVERSE AIR

REVERSE AIR

Auto cleaning

Why Reverse Air Cleaning

Regularly cleaning the filter with auto cleaning(reverse air) is necessary to maintain its performance and prevent potential damage. Neglecting to clean the filter can have several consequences.

- Firstly, a dirty filter can lead to decreased airflow, which means it will take longer to style. This can be frustrating and time-consuming, especially if you have thick or long hair.
- Furthermore, a clogged filter can cause the motor to overheat. When the motor overheats, it can lead to damage and potentially result in the need for costly repairs or even a replacement.
- By regularly cleaning your filter, you can prevent these issues and ensure that the multi styler continues to perform at its best
