

# EXTREME RENEWAL

## MAXIMUM STRENGTH KERATIN SMOOTHING TREATMENT

**KERATHERAPY EXTREME RENEWAL** is a maximum strength keratin smoothing treatment that smoothes and dramatically reduces frizz and curls on fine to medium textured hair.

### FEATURES

- Delivers long-lasting nourishment and protection for up to 12-16 weeks
- Provides maximum smoothing and curl reduction on normal, fine or medium textured hair
- Improves hair texture and condition
- Adds suppleness and shine
- Replaces damaging relaxer services
- Safe for color-treated hair
- Reduces blow dry, ironing and overall finishing time by 50% or more

### KERABOND TECHNOLOGY

Combines the benefits of keratin with proteins, amino-acids, nutrients and natural ingredients resulting in strong, healthy hair that is frizz-free, shiny, smooth, manageable, and resistant to humidity.

### PANTHENOL

Form of Vitamin B that seals the cuticle while creating incredible shine. Maintains optimum moisture balance and repels humidity

### ARGANIA SPINOSA (ARGAN) OIL

Restores shine, cares for the scalp, and minimizes the damage caused by split ends. Rejuvenates hair from root to tip, increasing strength, elasticity and overall health

### OLEA EUROPAEA (OLIVE) OIL

Conditions, smoothes, and adds shine

### WHEAT GERM AMINO ACID

A rich source of vitamin E and protein that relieves dryness and adds softness and moisture to the hair

### COLLAGEN AMINO ACIDS

Increases elasticity, strengthens and promotes growth

### JOJOBA SEED OIL

Rich in minerals and vitamin E, acts as a humectant and creates a protective film over the hair shaft that helps seal in moisture and adds shine. Helps to repair hair damaged by heat and styling

### TOCOPHERYL ACETATE (Vitamin E)

Gives life to dull, limp hair. Heals, rejuvenates, softens, soothes and protects the hair and scalp

# application process

(shake well before use)

Begin with a thorough consultation with your client. Be sure that the hair is healthy enough for a keratin smoothing service.

- 1. SHAMPOO:** Cleanse hair with Keratherapy Clean Start Pre-Treatment Shampoo. Work shampoo into a lather from roots to ends, being sure not to massage or scratch the scalp. Rinse and Repeat. **NOTE:** If using directly after a color or highlighting service, cleanse hair gently with Keratherapy Moisture or Volume Shampoo instead of Keratherapy Clean Start Pre-Treatment Shampoo.
- 2. TOWEL DRY:** Towel dry the hair to remove excess moisture. If hair dries during application, mist hair with water to achieve a towel-dried effect. Hair should be damp, not wet.
- 3. DIVIDE:** Detangle the hair with a wide tooth comb and divide damp hair into 3-4 large sections.
- 4. MEASURE SOLUTION:** Determine estimated amount of treatment needed based on length/density of hair:
  - Short hair 1/2 oz
  - Medium hair 1/2 to 3/4 oz
  - Long hair 3/4 to 1 oz
- 5. APPLICATION:** Wearing gloves and using an applicator brush, take 1/4" to 1/2" sections and begin each section by dabbing the treatment 1/4" from the scalp, then repeating every 1" to 1 1/2" until you reach the ends. Massage the treatment into each section, then comb through with a fine tooth comb away from the face to remove excess. Do not oversaturate the hair and do not apply to the scalp or skin.  
**DO NOT RINSE.**
- 6. PROCESS:** Cover with a plastic cap and place under medium heat hood dryer for 10-15 minutes before blow drying. This helps to ensure better penetration of the Keratherapy Extreme Renewal formula. If less curl reduction is desired you can skip this step.
- 7. BLOWOUT:** On medium heat, blow dry the hair up to 75-80% with a Keratherapy Vent Brush. Finish the blowout straight and smooth with a Keratherapy Thermal Brush, using tension until 100% dry using cool or medium heat. Always blow dry away from the face and away from neighboring stylists or clients.
- 8. FLAT IRONING:** Start at nape of neck and take 1/4" to 1/2" sections of hair and iron each section thoroughly from roots to ends until smooth and shiny. Adjust iron temperature between 400°F-450°F, or 204°C-230°C using the chart below and depending on the health and/or resistance of the hair. A test strand is recommended. Always iron away from the face. Continue this process until all the hair is thoroughly ironed.

**9. COMPLETION:** For guaranteed results, client should wait 48 hours to shampoo, get hair wet, use bands, clips, etc. If hair becomes wet or crimped during this time client should dry/iron smooth as quickly as possible.

**10. STYLE:** Best results are guaranteed by using Keratherapy Keratin Infused Home Care Products.

**WARNING:** Keratherapy Extreme Renewal is NOT recommended for ages 12 and under. Do not use this product if you are nursing, pregnant or have respiratory conditions. If product contacts skin, rinse well. If it comes in contact with eyes or is ingested, contact a physician immediately. Keratherapy Extreme Renewal should only be used in a professional salon and by a licensed stylist. Keep out of reach of children.
