## Sheer Glass Coat

### What it is

This lightweight, thermal protecting spray turns dull, unruly strands into a silky, glass likeshine that lasts for a minimum of two shampoos.

### How to use

The Sheer Glass Coat needs heat and tension to activate its frizz-fighting formula and achieve a sleek, smooth, glossy humidity proof finish that lasts. Towel dry hair, then divide the hair into even sections and spray a liberal amount of Sheer Glass Coat on damp, not soaked hair. Comb through from roots to ends with a comb. Blow dry each section with a brush to create tension as you direct dryer heat set to a medium to high setting until each section is completely dry.
